United States Troops to Remain on the Island Until Platt Amendment is Adopted.

### INSTRUCTIONS TO WOOD

It Is Officially Stated That the United States Will Remain in Control of Cuba Until the Platt Amendment Has Been Substantially Adopted-Probable Course of the Cubans-Municipalities Will Petition the Convention to Pass Origfnal Amendment.

By Exclusive Wire from The Associated Press, Washington, June 1.-It is officially stated that the United States will remain in control in Cuba until the Plait amendment has been "substanadopted. This was made known to General Wood last Tuesday by Secretary Root, and the action has been approved by the president.

Secretary Root was with the presi dent for about an hour and a half today, discussing with him the dispatch which was prepared to be sent General oWed, relating to the setion of this government on the Cuban constitution. The message is a long c, and will be forwarded to General Wood with the idea of having him communicate It to the constitutional convention. It will not be made publis at this time, and probably not until

the convention takes action. Secretary Root has received no copy of the Cuban constitution as adopted, the copy received being furnished by General Wood, and consequently the retion taken now is considered of the some unofficial character, but indicates the determination of this govcoment to reject the constitution in its present form.

Havana, June 1.-The press deplores the misunderstanding with the Washington government, but generally admits the possibility of a wrong construction being put upon the Platt amendment by the explanations and interpretations, and that it will be best for the convention to take up the question immediately and accept the amendment passed by congress, La Luch says that 85 per cent, of the people favor this, but the delegates are at a loss what to do. Some say that the United States is not acting in good faith, as it was most improbable that the Washington authorties did not know what the convention was daing and what was the ne ture of the report to be submitted. Tacy further say that a majority of the committee on relations told then the amendment as accepted would be satisfactory to the United States, and that they had the assurance of General Wood and Secretary Boot to this effect. The members of the committee on relations will say nothing regarding this point that they, too, thought it would be satisfactory.

Secret sessions and absent stenographers make it impossible for even the delegates themselves to set things aright.

Regarding the controversy which will surely arise later, as to who is responsible, the convention will place responsibility on the committee. and they it is said, will blame Clenoral Wood and Secretary Root. An effort is being made today by some of the conservatives to avoid this crisis by asking the convention to adjourn for a month, and in the mean time have the municipalities petition the convention to pass the Several municipalities have already taken that action, and it is thought that others will fall into

By Exclusive Wire from The Associated Press. Lebanon, Pa., June 2.-Republican primaries were held in this city and county yesterday. The Quay and anti-Quay factions each had candidates in the field. A large vote was polled and the returns were not obtainable until early this morning.

Although the anti-Quay men have generally been successful in electing their candidates in the county for several years the Quay people sprung a surprise this time by electing their en-tire ticket by good majorities. This success gives the Quay men four delegates to the state convention, a district attorney and two candidates for director of the poor,

# **DOWIERETURNS TO EARTH**

He Claims to Be Elijah, John the Baptist and Others-3,000 People Gaze Upon Him.

By Exclusive Wire from The Associated Press. Chicago, June 2 .- "I am Elijah the prophet, who appeared first as Elijah himself, second as John the Baptist. and who now comes in me, the restorer of all things. Elijah was a prophet, John was a preacher, but I combine in myself the attributes of prophet, priest and ruler over men. Gaze on me then: I say it fearlessly. Make the most of it, you wretches in ecclesiastical garb. I am he that is the living physical and spiritual embodiment of Elijah and my commission to earth a third time has been prophesied by Mathew, by God himself, by His son Jesus, by Peter, and three thousand years ago by Moses, All who believe me to be in very truth all of this will stand up," and over 3,000 people rose to their feet and greeted the declaration with cheers and hand clapping.

John Alexander Dowie, true to his romises, made this statement from the platform of the Auditorium tonight in the presence of 5,000 people. It was the culmination of a frenzied speech, in which he denounced everybody and everything not in Zion, cursed the pope and the Roman Catholic church, spat iterally at Masonry, the newspapers and the bankers of Chicago and raged and tore up and down the stage like a

mad man. "Understand what I mean," he continued. "I will take no counsel in my method of government. I have come to proclaim theoeracy, pure and simple, he government of God, by God and for God and I will never rest till all other forms of government have been driven from the earth."

The State Department Receives an Important Communication Regarding Our Trade with France.

### ENCOURAGING REPORTS

Consul Gettan, of Nantes, Notes the Remarkable Development of the Trade in American Machinery. Satisfaction Is Given by All Machinery Made in the United States. Harvesting Implements Are Especially Popular-Fastest Time Is Made by the Locomotives Manufactured in This Country.

By Exclusive Wire from The Associated Press. Washington, June 2 .- In a communication to the state department, regarding trade with France, Consul Gettan, of Nantes, notes the development of the trade in American machinery in Western France. During the past season, he says, about 800 reapers, mowers and horse hay-rakes arrived at that port. American mowers give good satisfaction, and the increased prices asked for farm labor will stimulate the sale of such machinery in the future The American mower was a common sight in the hay fields last summer. In regard to the advantage gained by exhibiting machines, the consul says:

New England factory made an exhibition of meat choppers in one of the Nantes stores, and during the afternoon sold about twenty of various sizes. The Nantes house has since sold more than 200 of these machines. "If some company were to make an exhibit of wringers, and show their working, I am satisfied it would be found a profitable enterprise. There

are no wringers sold or offered for sale

Consul Covert, of Lyons, says: "The houses of this district, which some years ago furnished fine French hardware to the United States, have almost entirely lost that trade within the last two decades, and they are enabled to hold their own market here only by a protective tariff. American stoves, base burners and smaller heating stoves find a steady market here,

entting instruments are pronounced the best in the world, because Americans are the greatest wood-using people. American wrenches are seen in some stores, but the German article is the most common, on account of its cheapness. Agricultural implements of American pattern bearing an American name are met with in every county fair, and are highly prized. Farmers tell me that they prefer to buy the Ohio or Illinois harvesting and having machines, notwithstanding the increased

"Consul Tourgeo, of Bordeaux, says The fastest time made by a railway, it is said, is on the road between this city and Bayonne, where a run of 123 miles is made every day in 128 minutes. It s quite to the credit of American mechanies that the honor of making this un is accorded to American locomotives."

The consul notes, as a curious fact, hat one of the chief exports from Bordeaux to the United States consists of preserved alimentary products, which are grown in the greatest abundance in the United States, and are often of much superior quality. Prominent among these are canned or bottled peas and string beans. There is not a particle of difference between them and the products of American gardens continues Mr. Tourego, except that the French beans and peas are of the smallest varieties, and are put up white they are but half matured and very soft; also, they are packed with great attention to artistle effect. The cans are not filled by machinery and the vegetables are not handled with a scoop shovel; everything is done by hand, and the wages of the girls who do this work depend as much on the appearance of the bottles as on the number filled.

# STATE OF COAL TRADE.

By Exclusive Wire from The Associated Press. Philadelphia, June 2.—The Ledger in its coal

The anthracite coal trade enters upon the menth of June with a further advance of 10 cents per ton for the various sizes of coal. This is, of itse, an additional profit to the coal companies out it is doubtful whether the advance will have my material affect in stimulating the present lying of coal, as semmer is almost upon u and the public are not now giving much though to the subject. There is only a moderate more ment of coal from the mines, either to tidewater r the west. The early rush to send coal up the ikes is slackening and the shirments by was of large. The trade has entered upon the du but the producing interests are not avers to stocking up, as they are expecting an en-larged demand later, owing to the fact higher rices will be charged the consumer to egular monthly 10 cents per ton advance.

Exclusive Wire from The Associated Press. Butte, Mont., June 2 .- The strange sliding movement of the city of Butte which has been noticeable at intervals for several years, has again manifdested itself by five large cracks in the earth in different sections of the city. The largest crevice occurred on West Galena street, where a crack twelve inches wide and of considerable length and depth, has appeared. Three of these openings occur in the west and two on the east. The gas and water companies have much trouble from the strange movement, which frequently breaks their underground pipes.

City Engineer Rickenbach says the ing department encounters the same trouble as marks n the city are constantly changing. This is particularly true of the section west of Main street and north of Broadway, where the marks have been known to shift to the extent of a foot in a very short time. What is causing the strange phenomenom is not known, but its continuance is begipping to cause some alarm among the citizens of Butte.

By Exclusive Wire from The Associated Press. Washington, June 2.-Mrs. McKiney continues very weak. Her condiion is not greatly changed from that of yesterday, but each day that clapses without a gain in strength lessens her powers of recuperation. The omplaint which came near ending ier life in San Francisco is still presnt. It is in a slightly less aggravated form, but gives the physicians and the president much concern. Mrs. Me-Kinley has shown remarkable vitality but her illness has so reduced her trength as to leave her very feeble ndeed. It is feared that unless a hange for the better soon manifests itself her strength may become so exhausted as to leave her without rallying powers. The news given out by the physicians in attendance today was not reassuring, though hope of better things still continues. After a consultation between Drs. Sternberg and Johnston, the following bulletin was issued:

"Mrs. McKinley passed a comfort-able night, but her condition has not materially changed since the reports

of yesterday." There were no further consultations of the physicians during the day, but Dr. Rivey called during the evening and spent some time with the patient. In response to inquiries from time to the statement was made that there had been no change in the condition of the distinguished sufferer.
